Professional Summary

Dedicated Cybersecurity undergraduate and Front-End Developer with practical experience in web penetration testing, secure software practices, and modern web technologies (React, JavaScript). Trained through premier national initiatives (DEPI & NTI) with hands-on expertise in identifying web vulnerabilities (OWASP Top 10), conducting security assessments, and building responsive web applications.

Education

Alexandria National University — Faculty of Computing and Data Sciences Sep 2025 – Jun 2029 (Expected)

Bachelor of Science in Cybersecurity | GPA: 3.65 Alexandria, Egypt

Training & Certifications

National Telecommunication Institute (NTI) Jul 2026 – Aug 2026

Trainee — Penetration Testing & Application Security Track Alexandria, Egypt

- Conducted hands-on web application penetration testing focusing on OWASP Top 10 vulnerabilities (Path Traversal, CSRF, Broken Access Control, SQLi, and XSS).
- Utilized industry-standard security tools including Kali Linux, Burp Suite, Nmap, and Metasploit for reconnaissance and vulnerability assessment.
- Practiced live exploitation and mitigation techniques through PortSwigger Web Security Academy and HackerOne environments.

Digital Egypt Pioneers Initiative (DEPI) — MCIT Apr 2026 – Aug 2026

Trainee — React Web Development Track Egypt

- Engineered responsive, dynamic single-page applications (SPAs) using React, JavaScript (ES6+), HTML5, and modern CSS frameworks.
- Integrated RESTful APIs, managed state efficiently, and implemented secure front-end architectural best practices.
- Collaborated on real-world projects applying version control with Git & GitHub in an agile workflow.

Projects

Library Management System | Java, OOP, Data Handling 2026

- Engineered an automated desktop application managing core library operations, focusing on strict OOP architecture and system modularity.

- Implemented logic for inventory management, transaction tracking (borrow/return), automated due date calculation, and user constraints.

Interactive GUI Tic-Tac-Toe Game | Python, Tkinter 2026

- Developed a desktop game with a dynamic graphical user interface utilizing Python's Tkinter library.
- Implemented game-state management, dynamic win-condition evaluation algorithms, and decoupled GUI presentation from core application logic.

Technical Skills

- ---

Cybersecurity & Tools: Burp Suite, Kali Linux, Nmap, Metasploit, Web Application Penetration Testing, OWASP Top 10, PortSwigger Labs.
- **Programming Languages:** Python, Java, JavaScript, R, C/C++ basics.
- **Web Development:** React, HTML5, CSS3, REST APIs, Front-End Security best practices.
- **Libraries & Platforms:** Git, GitHub, NumPy, Pandas, Matplotlib, Tkinter, VS Code.

Languages

- ---

Arabic: Native
- **English:** Proficient (C1 / Professional Working Proficiency)
